DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species groups of the generic invention. These species groups are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species groups are as follows:

The species of 'one compound which acts at the level of the epithelial structures' including:

1. The many different phenylpropanoids in claim 2.
2. The many different flavonoids in claim 3.
3. The many different isoprenoid derivatives in claim 4.
4. The many different application routes in claims 5 and 9.
5. The many different antioxidants in claim 8.

Applicant is required, in reply to this action, to elect a single, particular species of 'one compound which acts at the level of the epithelial structures' such as Kaempferol for example to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species from each species group, including

Art Unit: 1655

any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
